

Wayne,

- Current publication (1999) is 17 years old
- Very narrow in focus—preventive maintenance; not maintenance management, not facility management, just PM
- Had two primary goals:
 - Reinforce the statutory requirement to have a program of scheduled maintenance
 - Define/describe the scope of PM as involving all building systems (see the Appendix)
- Publication update planned for 2018
 - Initial draft 2/28
 - BR&GR review 3/15
 - District/public comment through 4/23
 - Final draft 4/30
 - BR&GR approval May '18
- May expand to discuss the five areas of facility management from regulation.
- New draft working title *Guidelines for Integrated Facility Management*.
- Want to incorporate some “tools” that will benefit districts; need help defining these.
