

About Us

We are Educators First

We understand education. We have years of boots-on-the-ground experience. Our leadership have all been in education for decades working with students, teachers, administrators, and communities.

Our goal is to fill the space between systems and learning, by partnering, supporting and empowering educational teams and community partners throughout the state.

Iris

"I'd like more opportunities, everything seems interesting, exciting, and fun!"

Professional Partners

For Schools, Communities, and Organizations

From professional development, to high level administration, to educational technology, our team has extensive experience specifically working with districts, schools, and communities to develop strategic plans and implement meaningful solutions that make systems work for you.

Every community is different, and our team has experience working with large and small districts throughout the state. We understand the complexities of Alaska, and of the people that live here.
